IVI 3D Printer Beta Test Program

Ⅰ. Test Aim

Experience the trial-produced IVI 3D printer by rapid and comprehensive testing to verify the performance and offer directions to optimize the product.

Ⅱ. Information about the Trial-produced IVI 3D Printer

1. What are included:

IVI 3D Printer * 1 + 0.3mm FDM Print Head * 1 + CNC Head *1 + Laser Head *1
1KG PLA * 1 + Wood Board for Laser * 3 + Double Color Plate for CNC * 2
Quick Start Guide * 1 + Packing List * 1
*Attachment1: IVI 3D Printer Packing List

2. Changes on functions:

1) Delete built-in camera (Built-in camera was taken into consideration during design, we will develop this function when the mass-produced printer perform stably.);
2) Delete Mobile App due to limited resource. You can use IVI 3licer on your PC to slice and to print;
3) Delete 2.3W laser head because the original manufacturer doesn't produce 2.3W laser module (We bought the laser diode from NICHIA).
Some local manufacturers can produce 2.3W laser module with cheaper price, but the performance and the stability is not guaranteed. Thus we use 1.6W laser head uniformly. From our testing, the laser power can reach 2.2W in practical use;
4) Equipped with 0.3mm FDM print head because other sizes haven't be verified yet. We will ship the rest add-ons you ordered later after testing;
5) We are sincerely sorry that the printers didn't engraved your name due to limited resources and time;
*You can check IVI 3D printer specs on our website.

Ⅲ. Test Items

*Attachment2: IVI 3D Printer Beta Test Item List

Ⅳ. Test Feedback Form

1.Bug Report: You can fill in the bug list on Google or send the bug list to support@ivi3d.com;
*Attachment3: IVI 3D Printer Bug List

2.User discussion: You can discuss questions and ideas with other testers in the forum under the beta adopter space;
3.Public review: Welcome to share the awesome prints or work in the forum with all the folks since other backers will not receive their IVI 3D printers shortly.

Ⅴ. Risks and Guarantee

1. Risks

Since it is our first batch printer, there might be bugs in use. The performance won't be perfect and may need optimization. Taking the first batch of IVI 3D printer means you understand and accept the risks.

2. Guarantee

We try our best to prevent shipping damage, including varies of simulation packaging test and actual shipping test domestically.
1) If the printer you received can function properly, it will be your delivered IVI. And we will try our best to help you update your IVI in the future and ship the optimized parts to you;
2) If the printer you received malfunctions due to manufacturing defects or shipping damages, and we cannot make it function after debugging and replacing parts, we will ship a new printer to you for free after optimization.

Ⅵ. Conditions & Expectations

1. Time investment

We hope you invest certain time to complete all the test items in 15 days and give us feedback after you received IVI 3D printer, because we need to catch up the time for optimization and mass production.

2. Notice

The comprehensive test of the first trial-produced printers is critical to IVI team and every backer, please assess if you can devote your time in finishing these tests and sending us your feedback. If you are too busy to test the first batch printer, you can wait for the delivery of mass-produced printer after optimization. We will ship based on the order sequence. Thank you for your support!

3. Non Disclosure Agreement

If you agree the above conditions & terms, please sign the attached Non Disclosure Agreement.
